

# 3M™ Scotchlok™ Copper/ Aluminum Compression Connectors, 20000 Series

**Data Sheet**

**September 2010**

---

## **Description**

3M™ Scotchlok™ Copper/Aluminum Compression Connectors, 20000 Series are made of high conductivity aluminum and are designed to cover a wide range of conductor sizes from 6 AWG through 1000 kcmil (MCM). They are designed to connect either aluminum and/or copper conductors. Each connector is electro-tin plated to resist electrolytic corrosion. They are installed using standard industry tooling. Chamfered ends, and an integral solid center barrier\*, ensure simplicity and ease of conductor insertion.

\*NOTE: 20001 and 20002 connectors have bore protrusions rather than a solid center barrier.

---

## **Agency Approvals**

UL Listed, meets requirements of UL 486B

---

## **Features**

- Simple installation using readily available tools
- Unique integral solid barrier center stop
- Manufactured using high conductivity aluminum
- Color coded end caps for easy connector identification
- Antioxidant material (compatible with solid insulations) inside connector barrel to facilitate clean conductor to connector contact

---

## **Applications**

- To connect aluminum and/or copper conductors from 6 AWG through 1000kcmil (MCM)
  - For low and medium voltage up to 35kV
  - For indoor and outdoor use
-

### Typical Properties

Not for specifications. Values are typical, not to be considered minimum or maximum. Properties measured at room temperature 73°F (23°C) unless otherwise stated.

3M™ Scotchlok™ Copper/Aluminum Compression Connectors, 20000 Series, when crimped with approved die sets, can be used on cables with an operating temperature of 194°F (90°C) and an emergency overload rating of 266°F (130°C). The connectors pass the requirements of UL486B (Underwriters Laboratories standard for safety). The current rating of these connectors meets or exceeds the current rating of the conductor size for which it is intended.

### Tool/Installation Information

Connectors shall be crimped with one of the approved die sets according to the engineering information supplied with the connectors. (Also see Crimping Tool-Die Sets table below)

\*Install as many crimps as possible without overlapping.

( ) Indicates minimum number of crimps for each cable insertion. Overlapping of crimps in order to obtain specified number is permissible.

## Shelf Life & Storage

The 3M™ Scotchlok™ Copper/Aluminum Compression Connectors, 20000 Series has a 5-year shelf life from date of manufacture when stored in a humidity controlled storage (10°C/50°F to 27°C/80°F and <75% relative humidity). Components of the connectors are not impaired by freezing or overheating due to ambient temperatures found in typical storage or shipping. Normal stock rotation procedures are recommended.
